BOKART

GLASS

Bokart team would like to welcome you to our exciting new catalogue that is amalgamating our development and innovation in glass and mirror processing with modern aluminium door, partition and screen systems.

Our whole range is designed and manufactured by us and we hope to inspire you to dream and design something completely unique - in either a commercial or residential environment - to bring practicality and extraordinary light and warmth.

Each project is different and we are here to help and inspire and to ensure you are presented with something that is, not just something unique and beautiful, but also fit for purpose.

Each product is tailor made on requested dimension, with a choice of different glass types, profile colors and systems.

From all of us at Bokart we are looking forward to your call and helping you with the nexts steps on your project journey.

MAIA wall

CONFIGURATIONS

Integrated hydraulic hinge with regulations of closing speed and of final sprint of the door.
Stop at 0° + 90° - 90° .
The absence of strike jambs allow a free movement of the door, both push and pull direction.

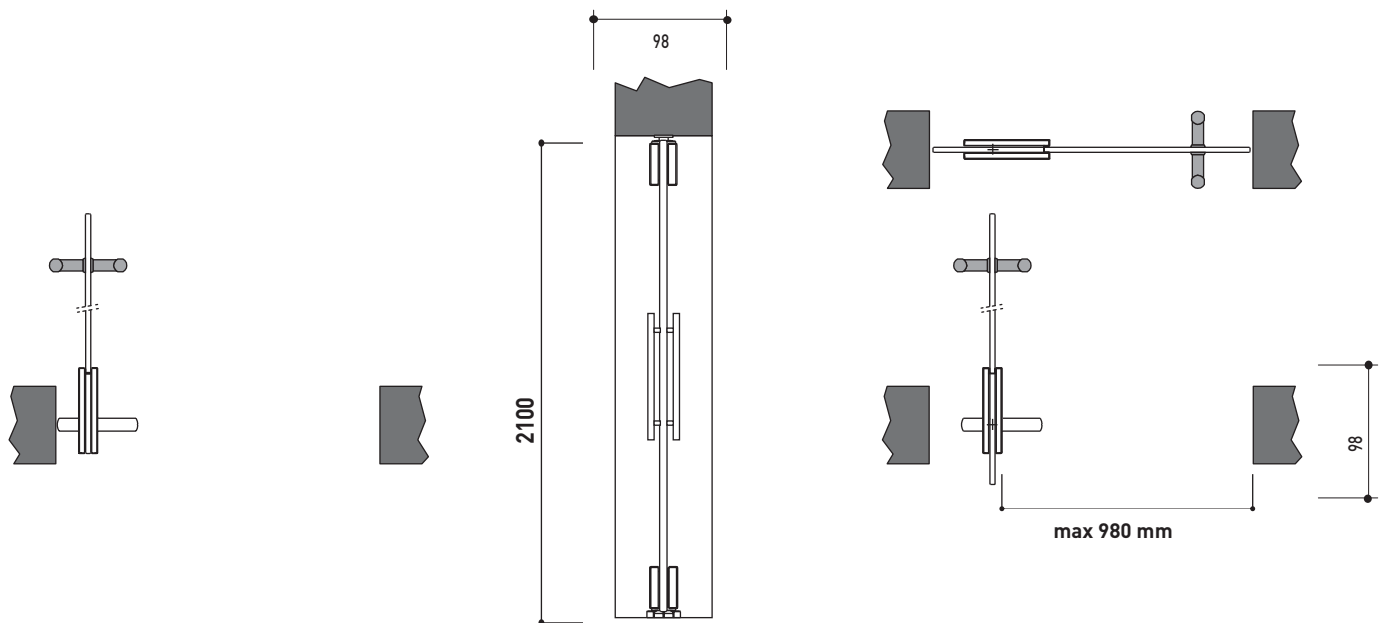

MAIA floor

CONFIGURATIONS

Integrated hydraulic hinge with regulations of closing speed and of final sprint of the door. The absence of strike jambs allow a free movement of the door, both push and pull direction. This system is perfect for places where the wall can't support the door's weight and where the installation of wall-hinges isn't possible.

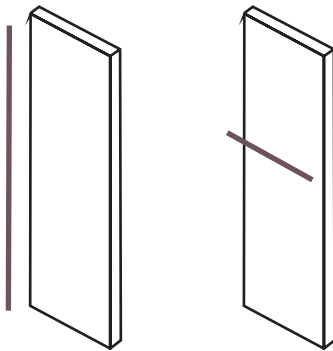

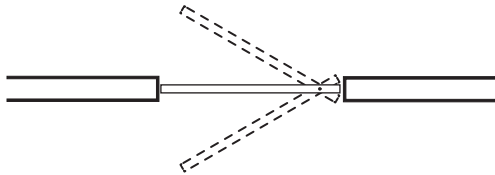

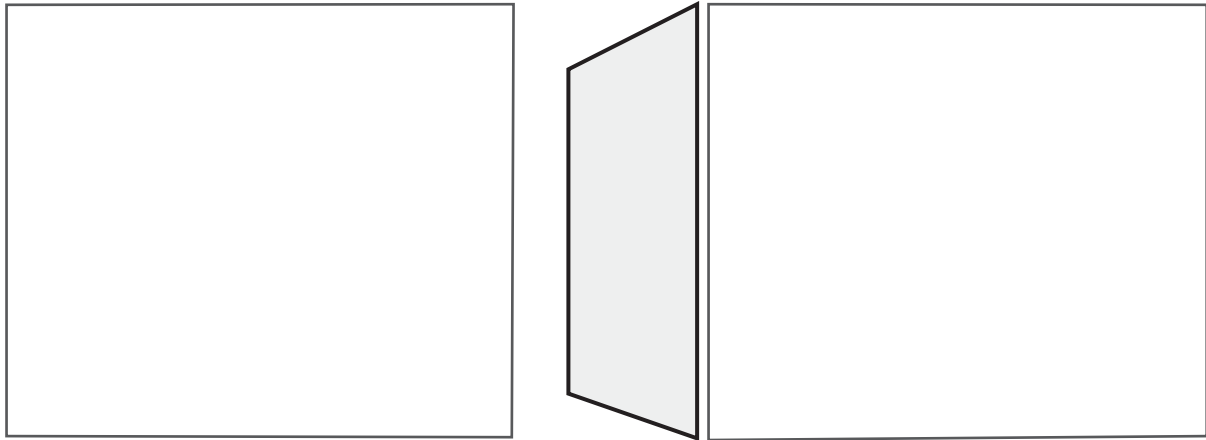

PIVOT OPENING

ETTA

ISSA

The pivot door rotates on a pivot box in the floor and the top jamb rather than traditional door side hinges. Regardless of where the hinge is placed, all of our custom built, luxurious pivot doors are perfectly balanced.

The pivot door has an opening up to 360°. The full-height hinge enables to eliminate frames and traditional hinges, enhancing the simplicity of the door.

BASIC GLASS

Having a natural light in our homes is not always the case, especially in smaller or compartmentalized spaces. Interior glass elements add a ton of architectural intrigue, even in spaces that initially look like a plain white box.

BASIC GLASS

DECORATIONS

BASIC GLASS

MIRROR

— Mirrors have earned status as an effective interior design tool used to fulfil practical purposes and a multitude of creative motives.

Mirrored doors eliminate the need to purchase a full-length mirror for your room and can create the effect of a larger space.

MIRROR

DECORATIONS

MIRROR

LACQUERED GLASS

Lacquered glass is manufactured by lacquer coating on one side of the base glass which makes glass highly durable and scratch-proof.

It is suitable for all interior spaces in which color makes a contribution to the enhancement of ambiance.

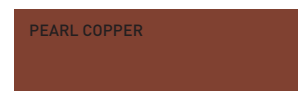

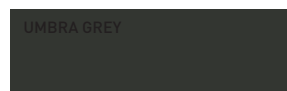

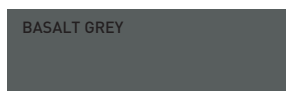

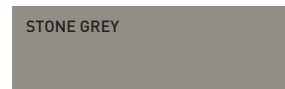

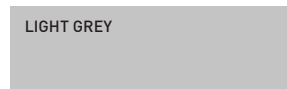

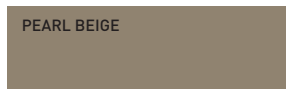

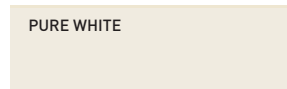

These glasses can be easily used and maintained.

Tempered Lacquered Glass are ensured that the beautiful colours last longer.

LACQUERED GLASS

DECORATIONS

LACQUERED GLASS

TRANSPARENT COLOR GLASS

— We have over 300 colors and tones from our color laminate collection that brings you the possibility to connect the interior design scheme or change the ambiance of any room with a dramatic or subtle color.

Color laminates are highly durable and UV resistant and can transform the atmosphere of any space during daytime or night. These are ideal for public spaces, offices and schools where coloured glass plays with or perspective of the world we inhabit calming or "exciting the space".

ETCH GLASS

With our innovative micro ETCH technique, we are able to produce any design on glass in a translucent and smooth satin finish.

The surface itself is durable and long-lasting.
Our collections provide numerous varieties of patterns in combination with our other glass techniques and technologies.

ANTIQUE MIRROR

Our antique mirrors are handcrafted by applying metal to the surface of the glass to a greater or lesser degree.

We can achieve heavy, medium or light levels of the antique effect combined with four different colors - silver, copper, gold and galena. This bespoke distress technique compliments any area within an interior scheme such as lobbies, bar decoration, feature walls, etc.

TEXTILE MESH

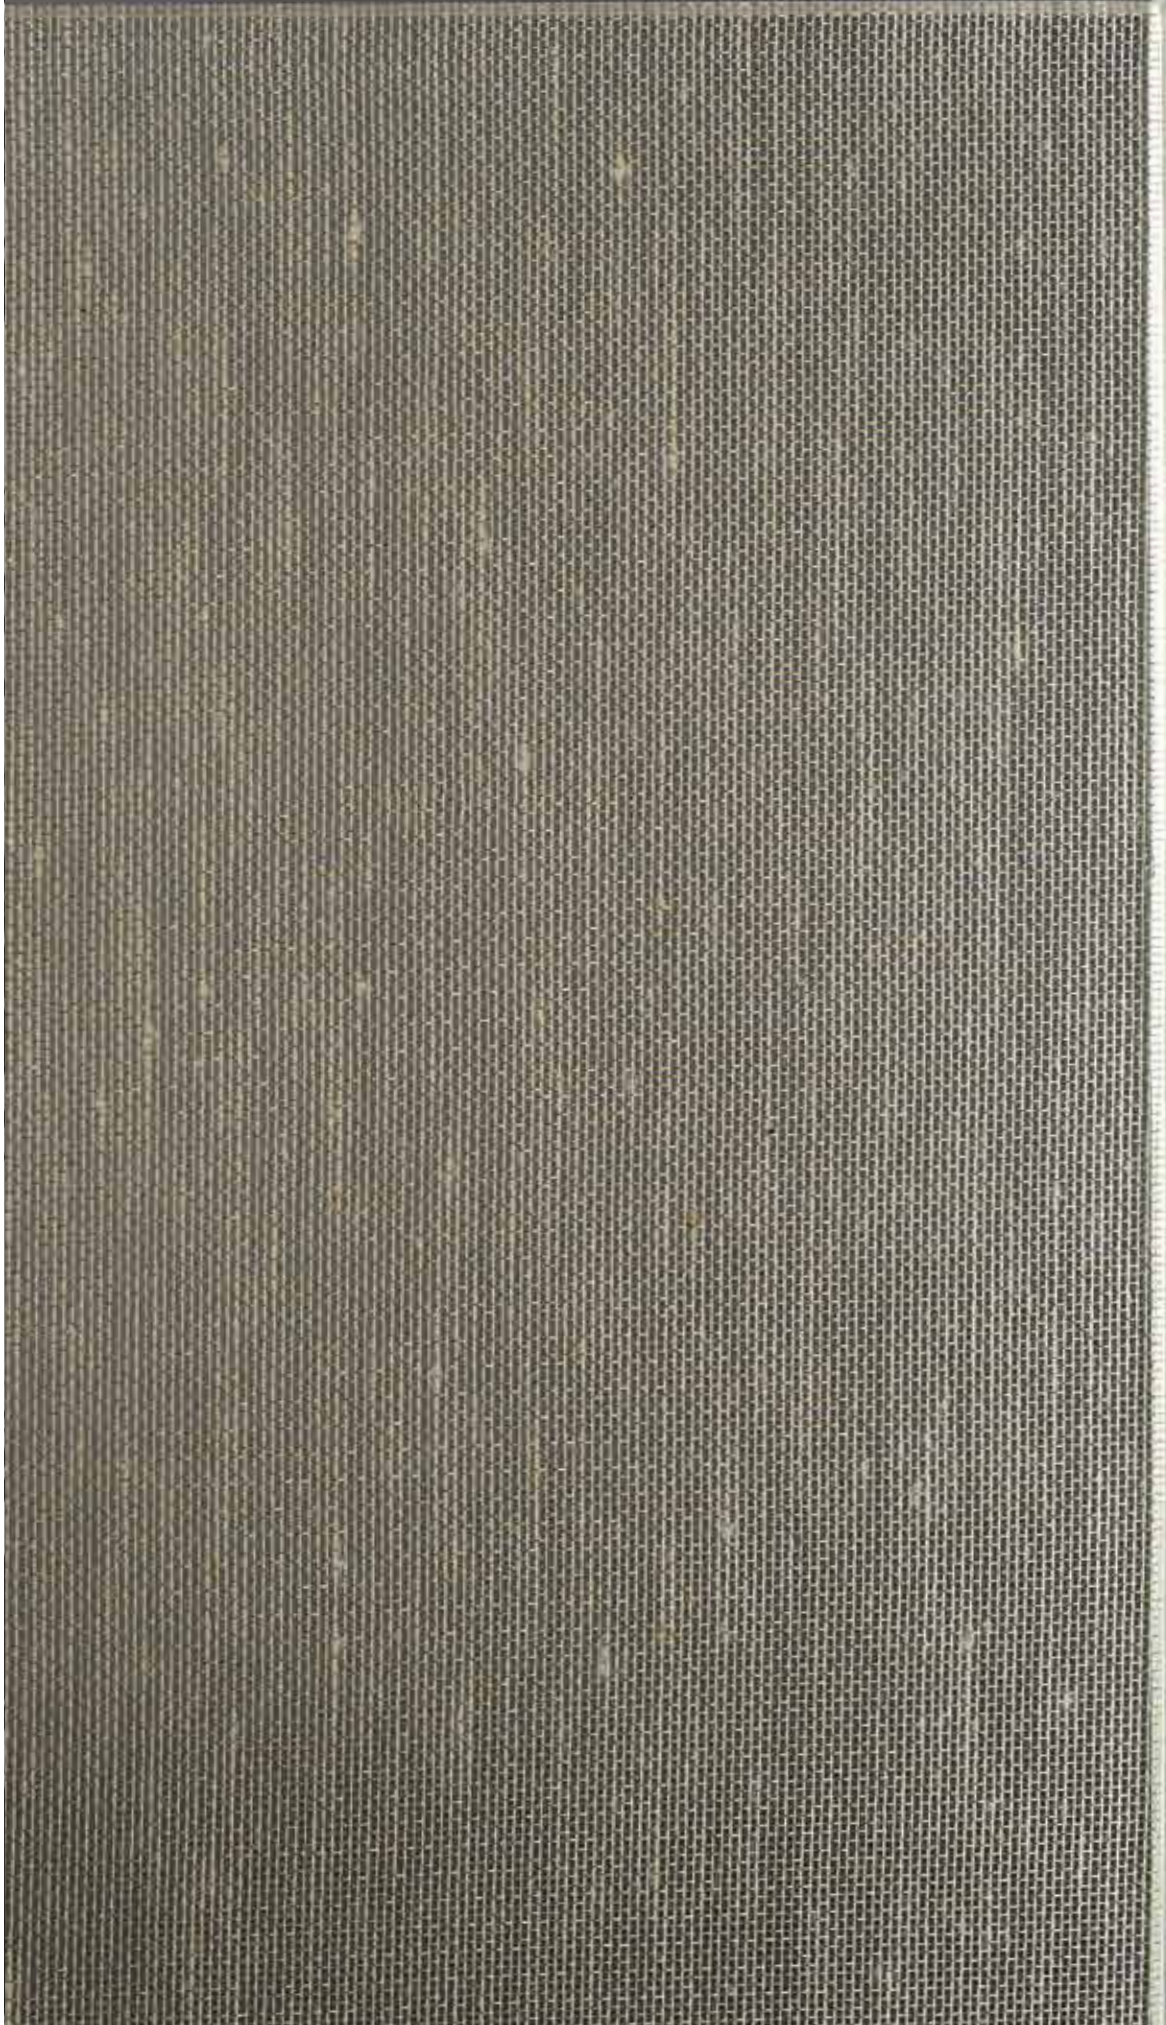

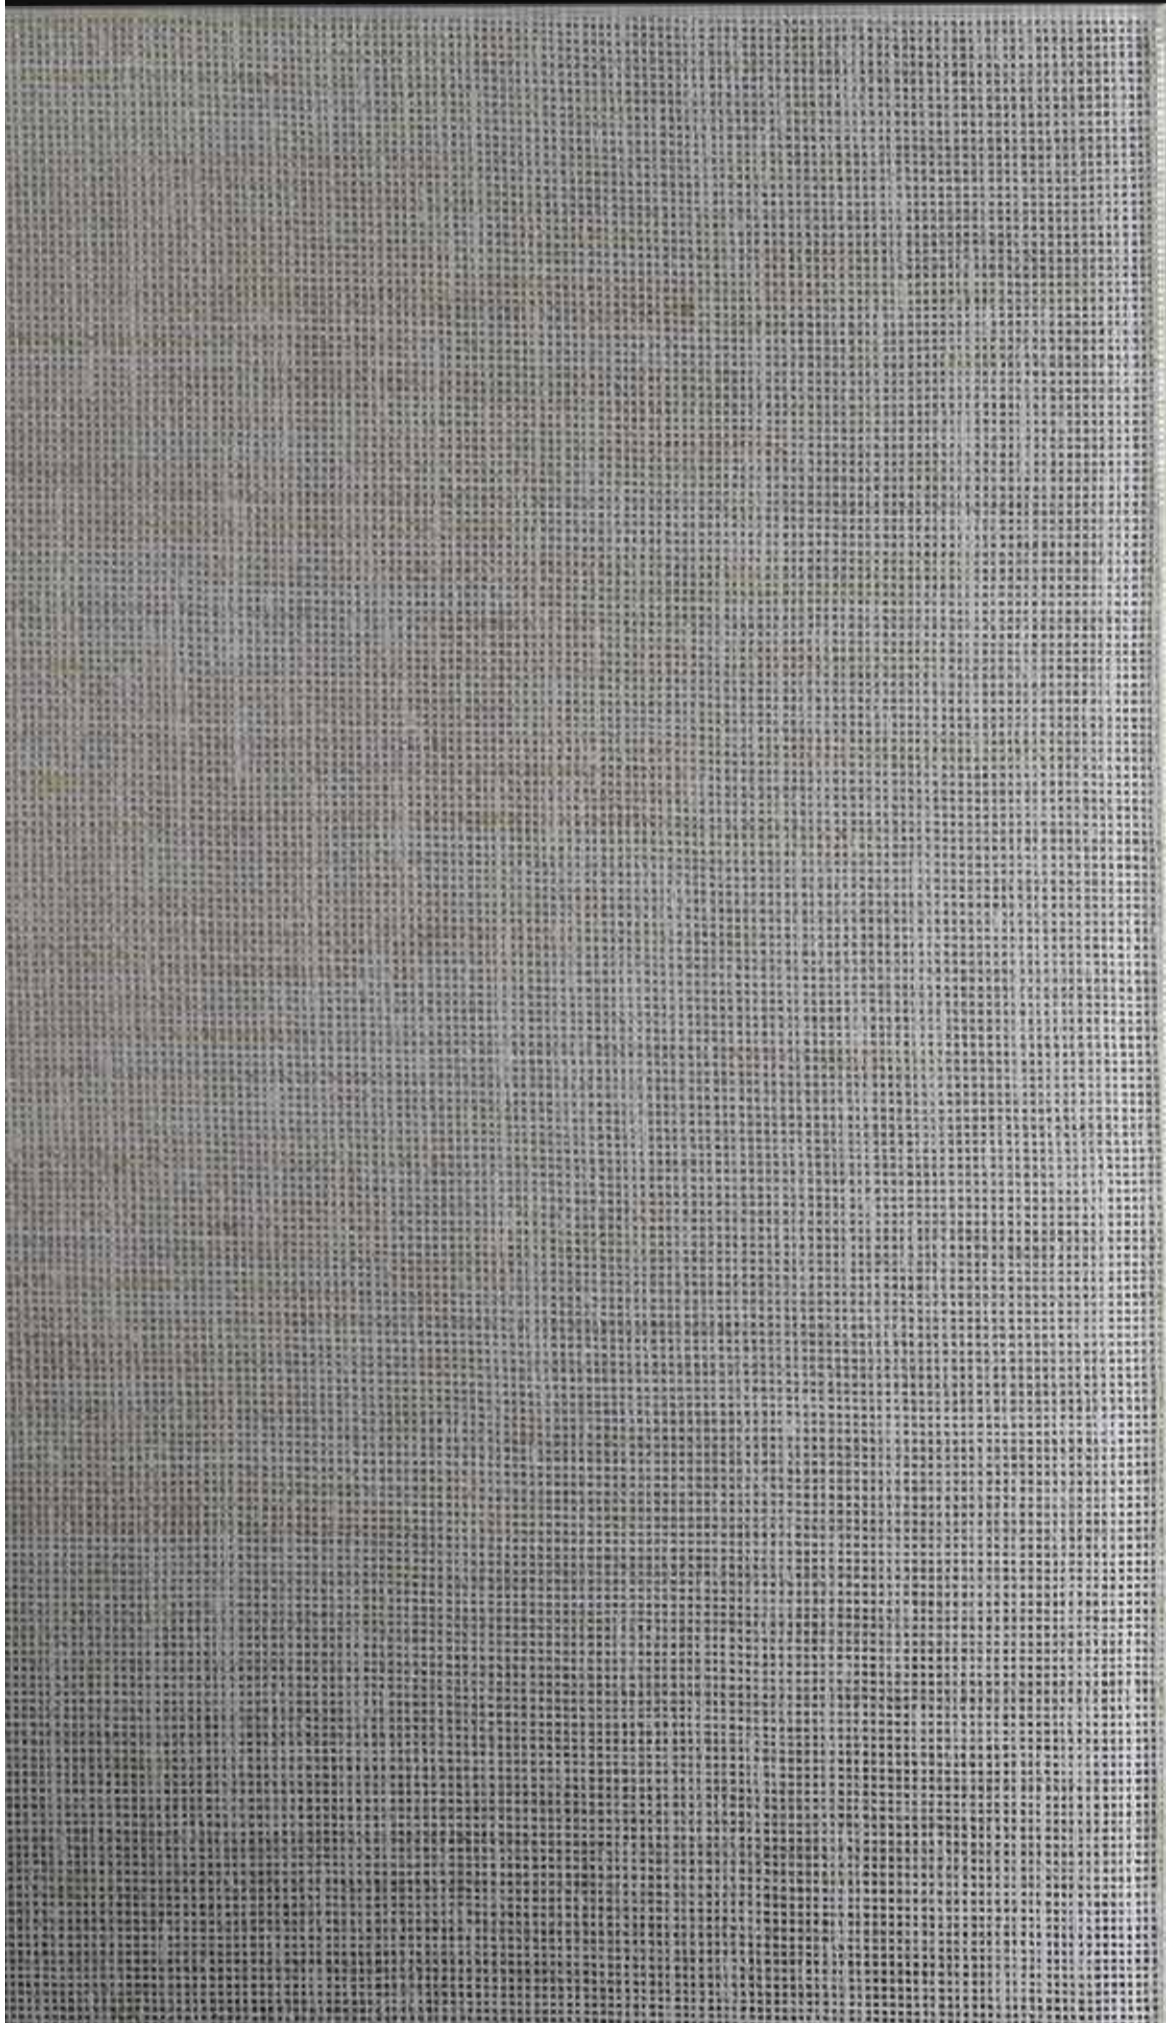

Textile mesh laminating gives you the opportunity to encapsulate a wide variety of textile meshes within the protective layers of glass.

The decorative and aesthetic qualities of the finely woven gauze through to thick braided weaves are preserved with the structural strength and practicality of glass.

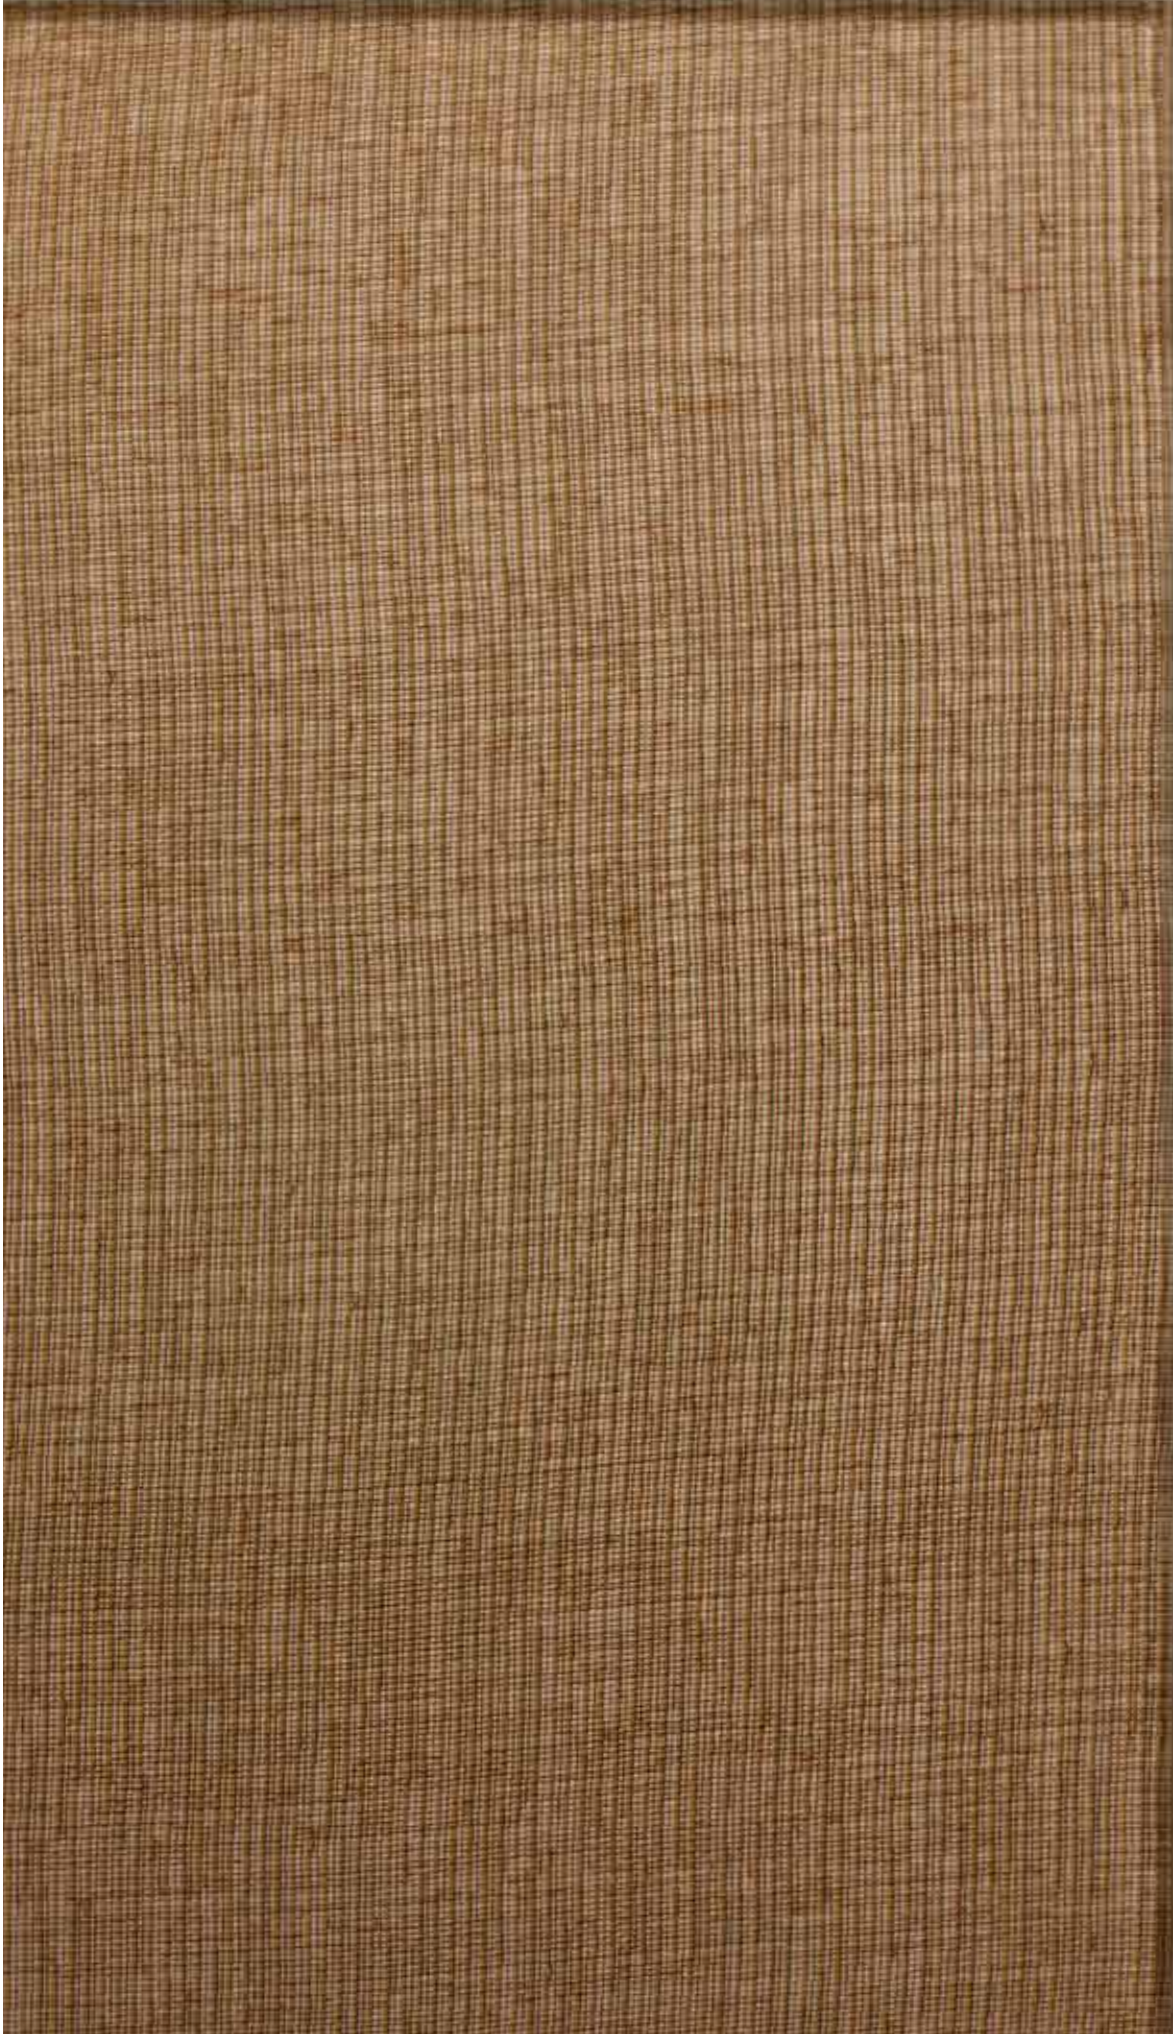

GOLD MESH

BEIGE MESH

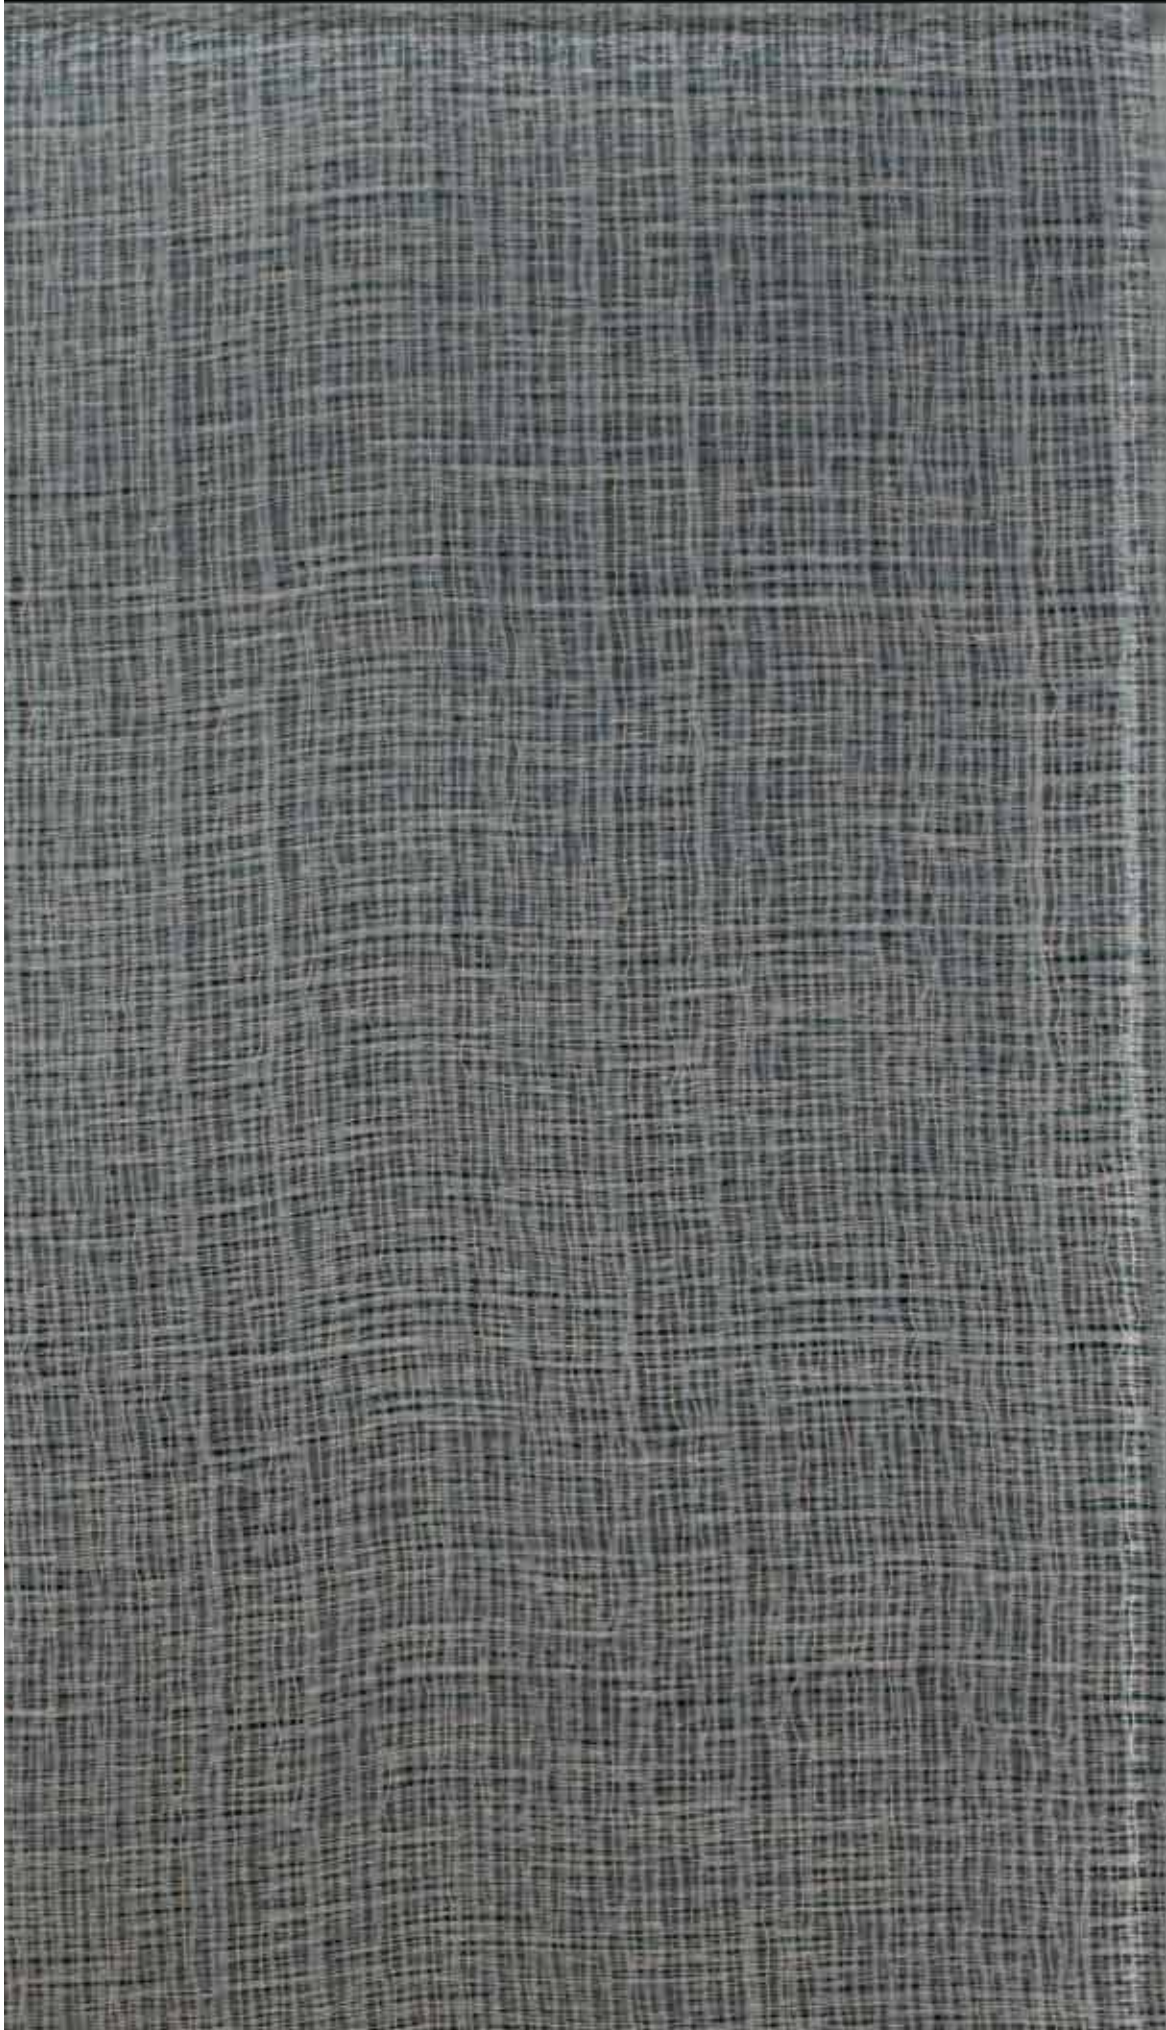

COPPER MESH

GREY MESH

PATTERN MIRROR

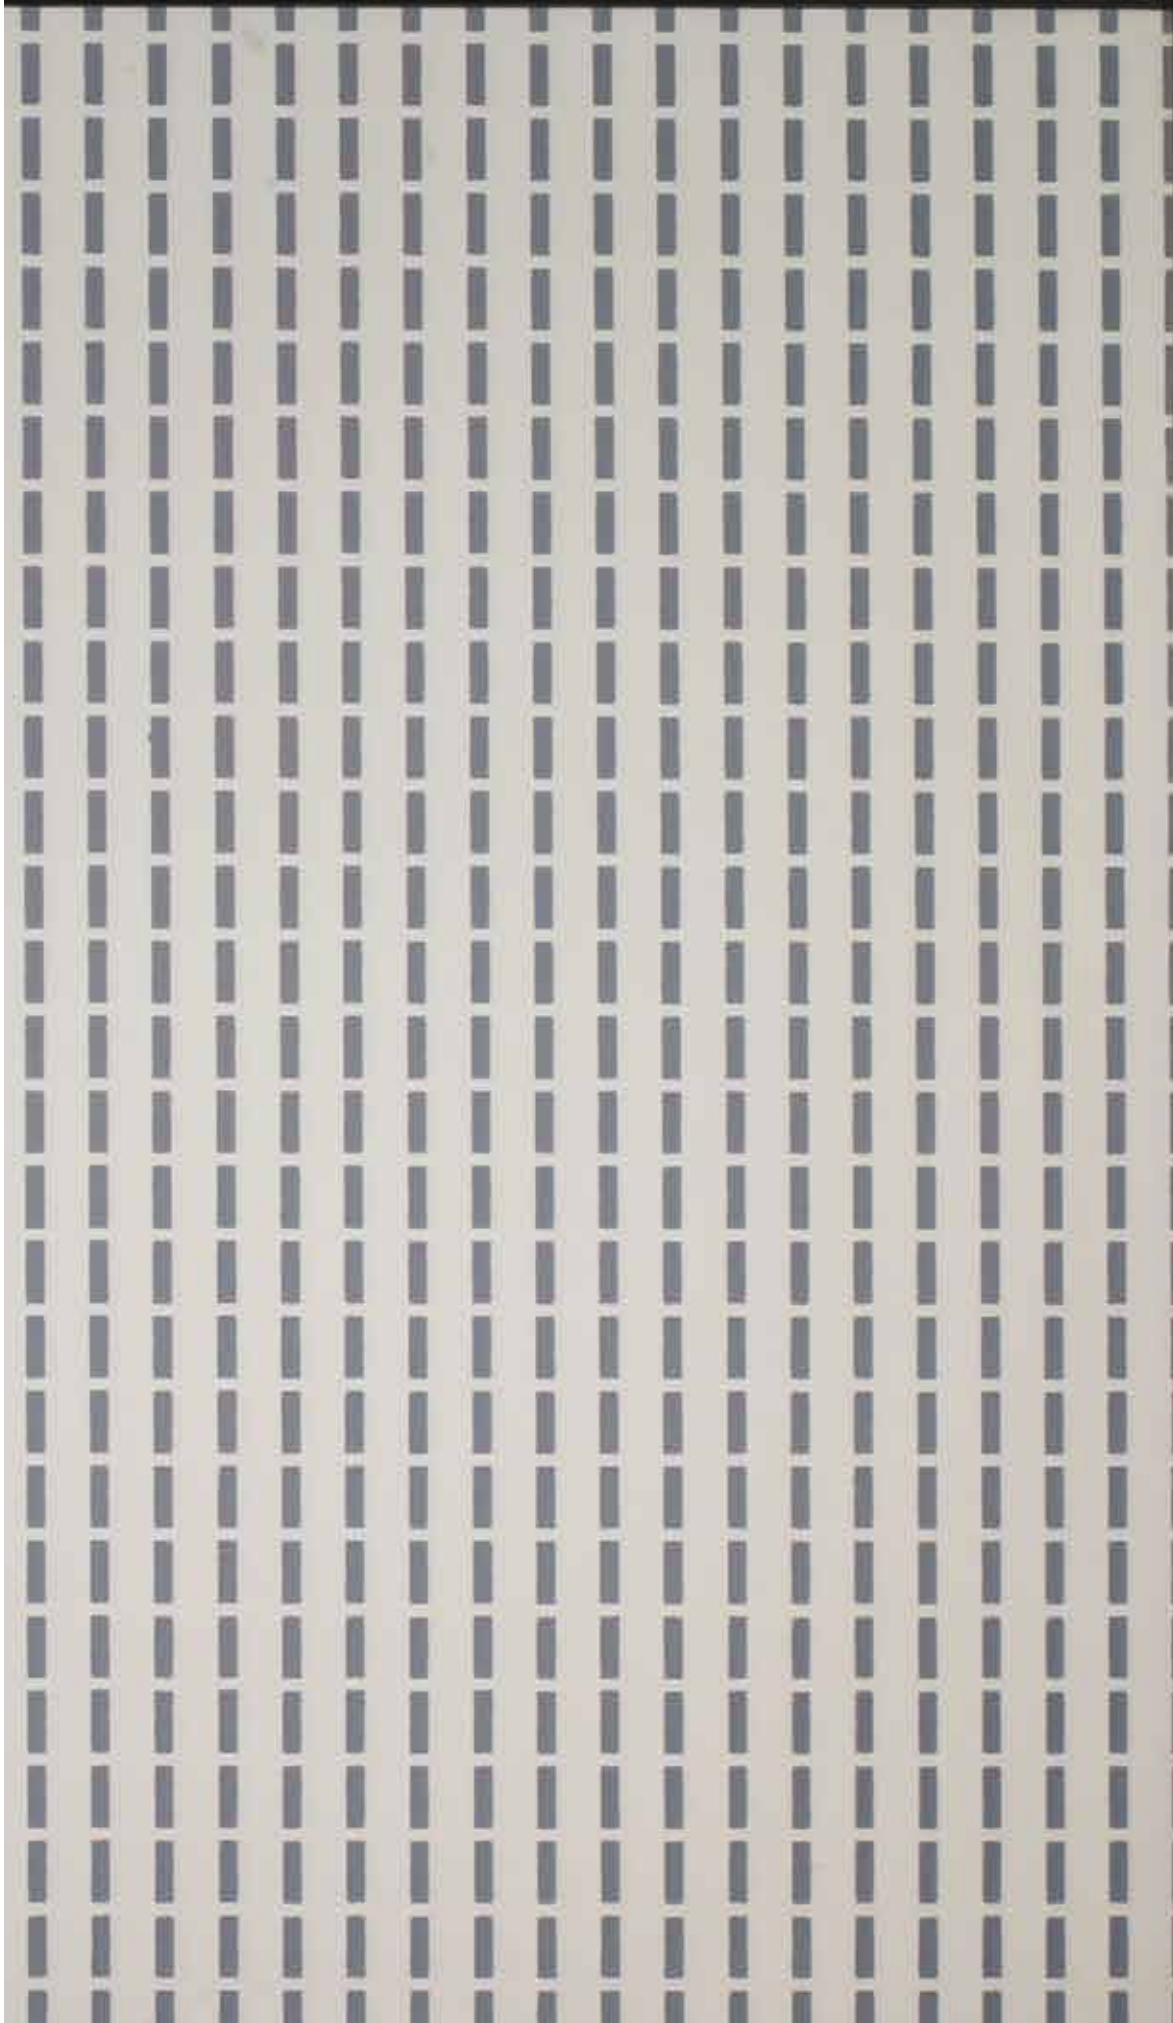

Our pattern mirror collection delivers an infinite variety of patterns on either a single plate or laminated glass. Applying a mirror to both sides of glass creates depth, movement, and shade inside the glass panel.

Because we control every stage of the manufacturing process we can adjust any of our techniques to suit your needs e.g. silvering (mirroring), colouring, by using different types of glass, etc. but ultimately the choice is yours.

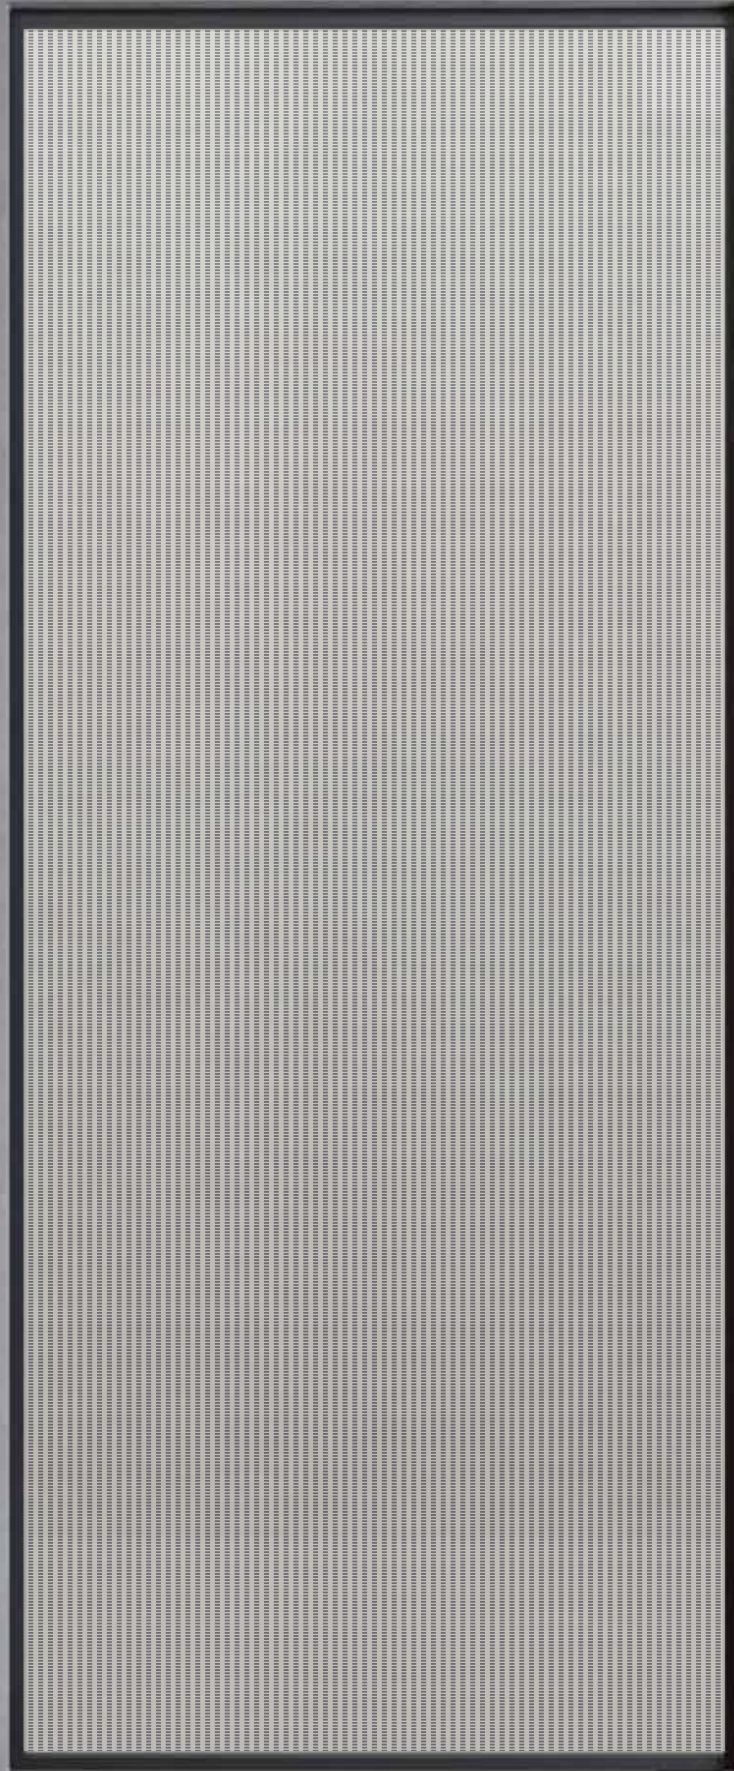

Pattern mirrors are a great solution for interior walls and space partitions by reflecting light, adding privacy and creating a luxury feel.

TEXTILE BY SILVIO

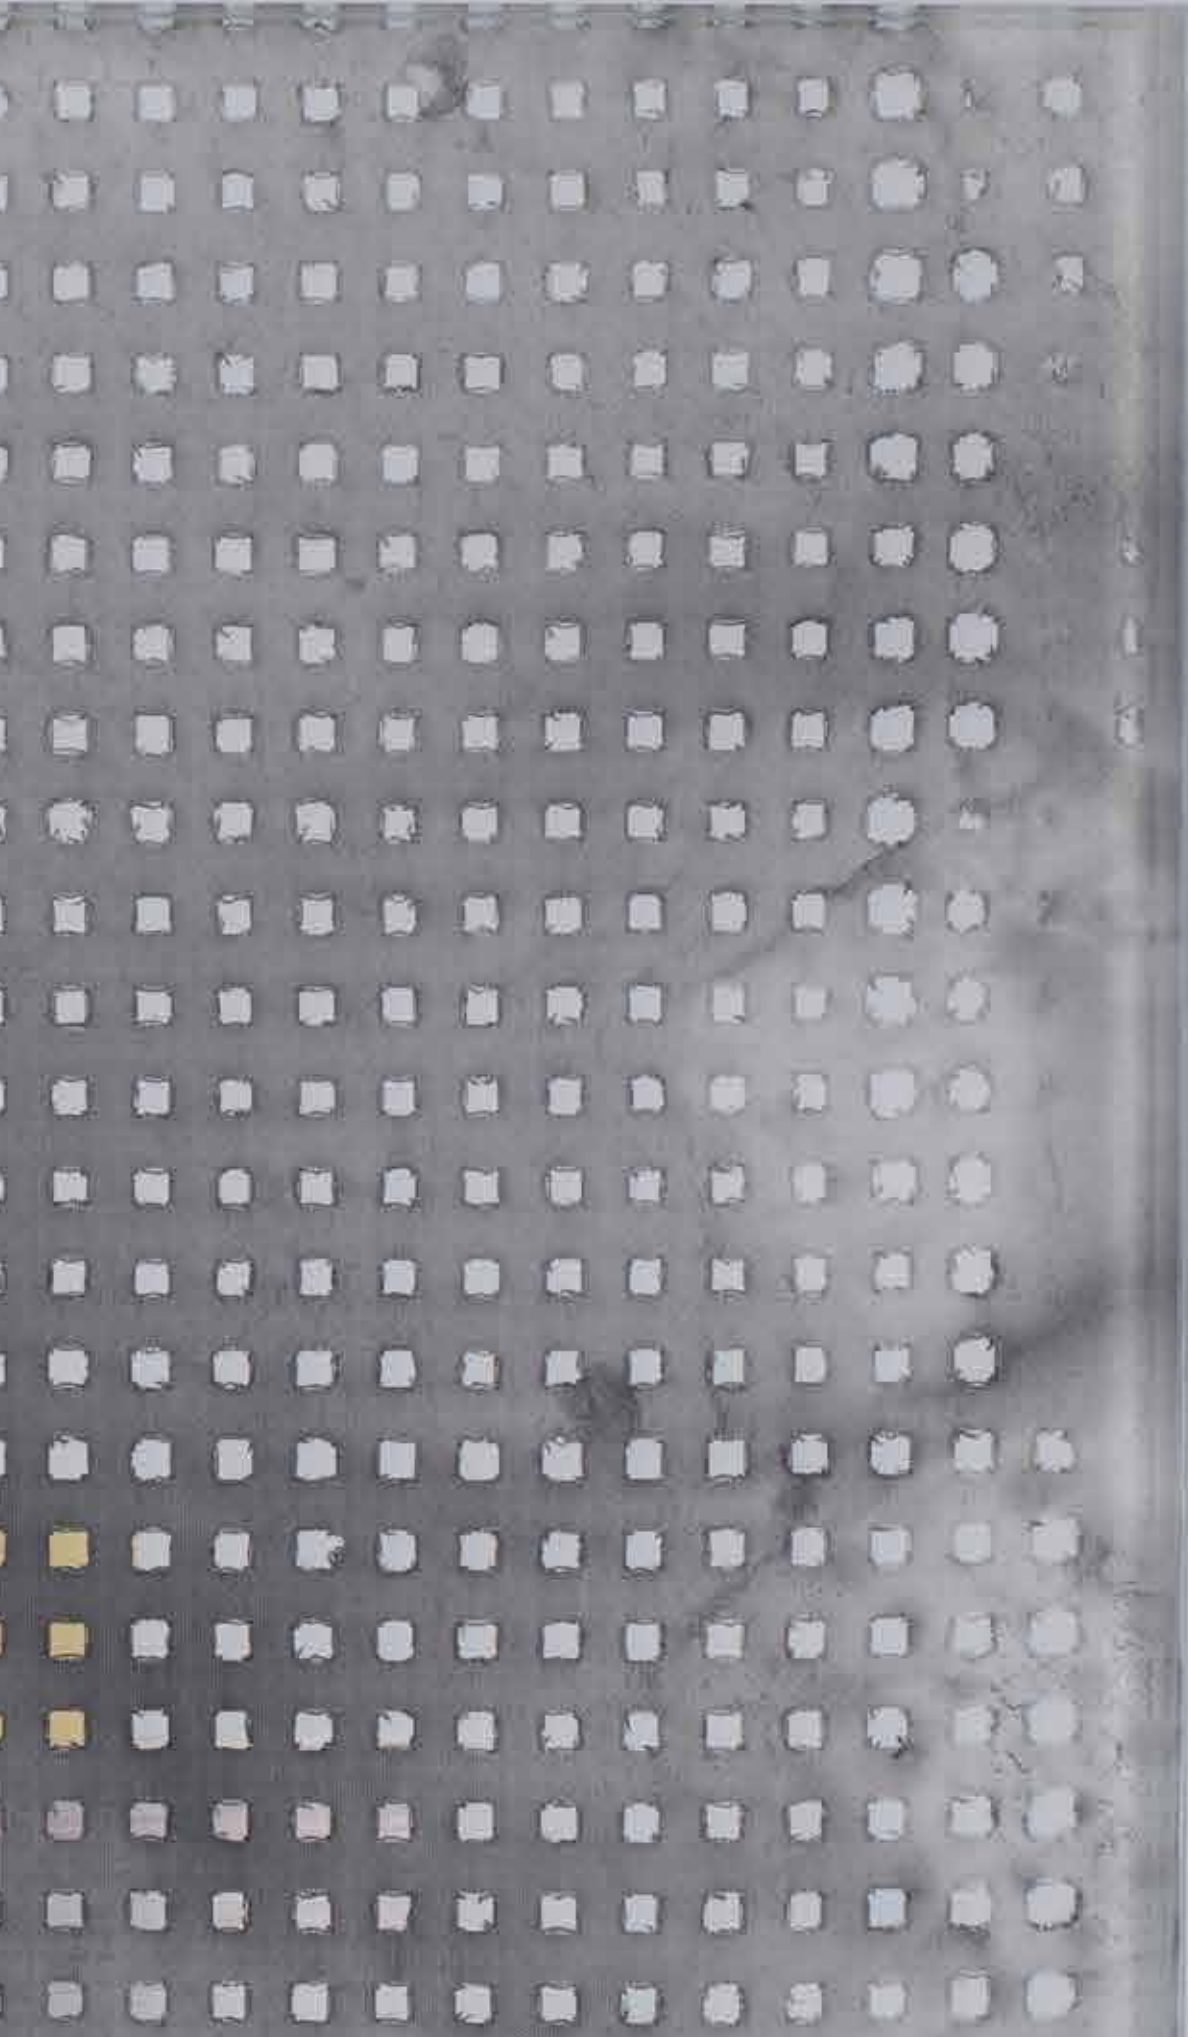

Created by visual artist and textile designer Silvio Vujičić, the S&S Collections brings together his innovative and experimental view on the world of textile which he merges with Bokart production technologies.

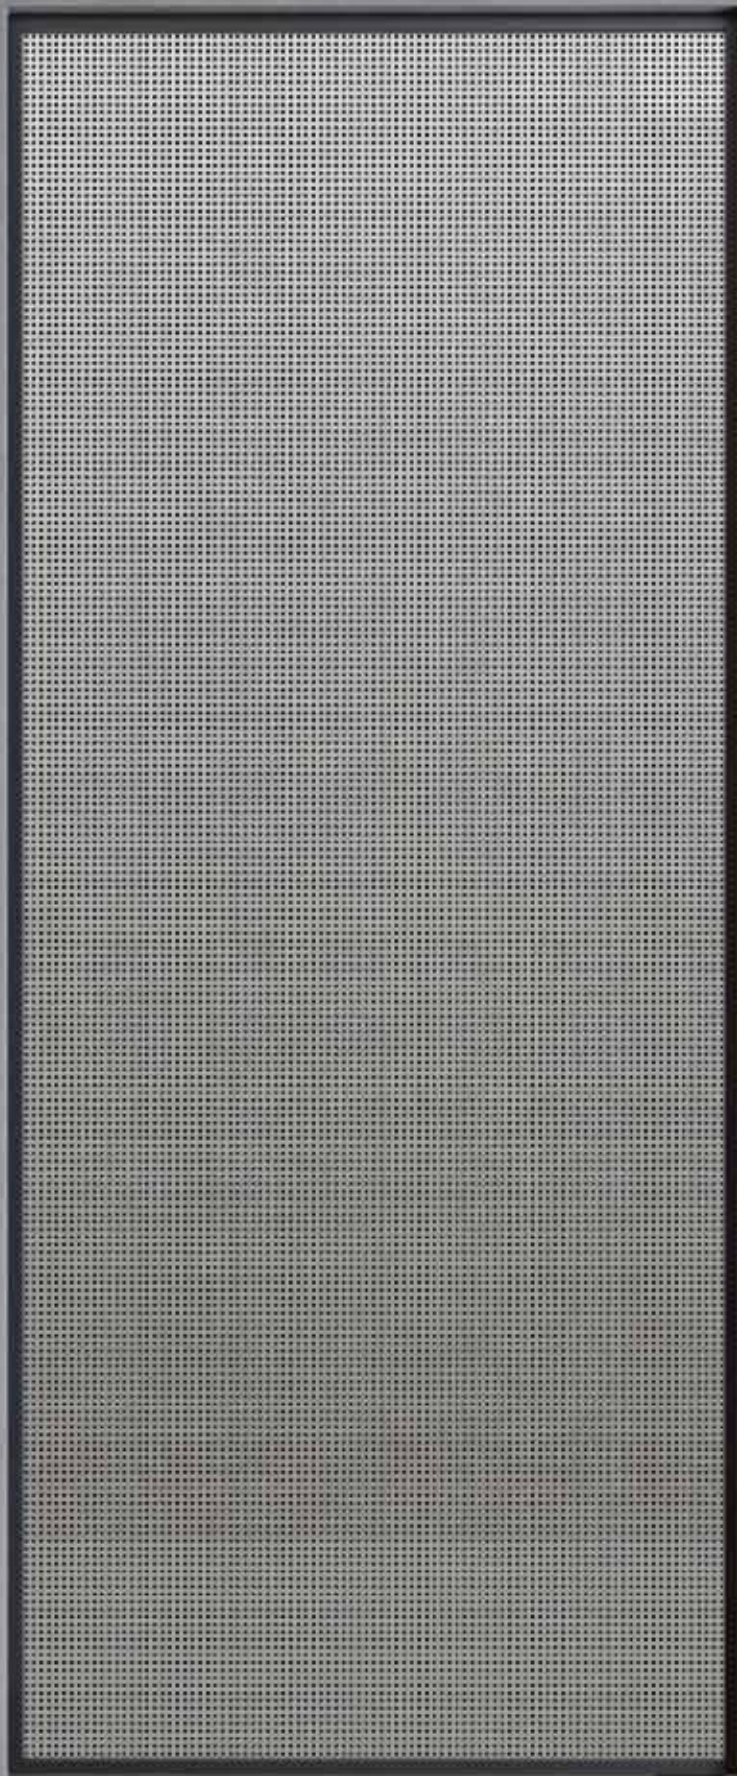

The collection is divided into two categories: directional / nondirectional patterns and bespoke pieces. Textile laminate is actually a textile between two or more layers of glass.

The process itself freezes the moment of these textiles and brings out the organic characteristic of fibers.

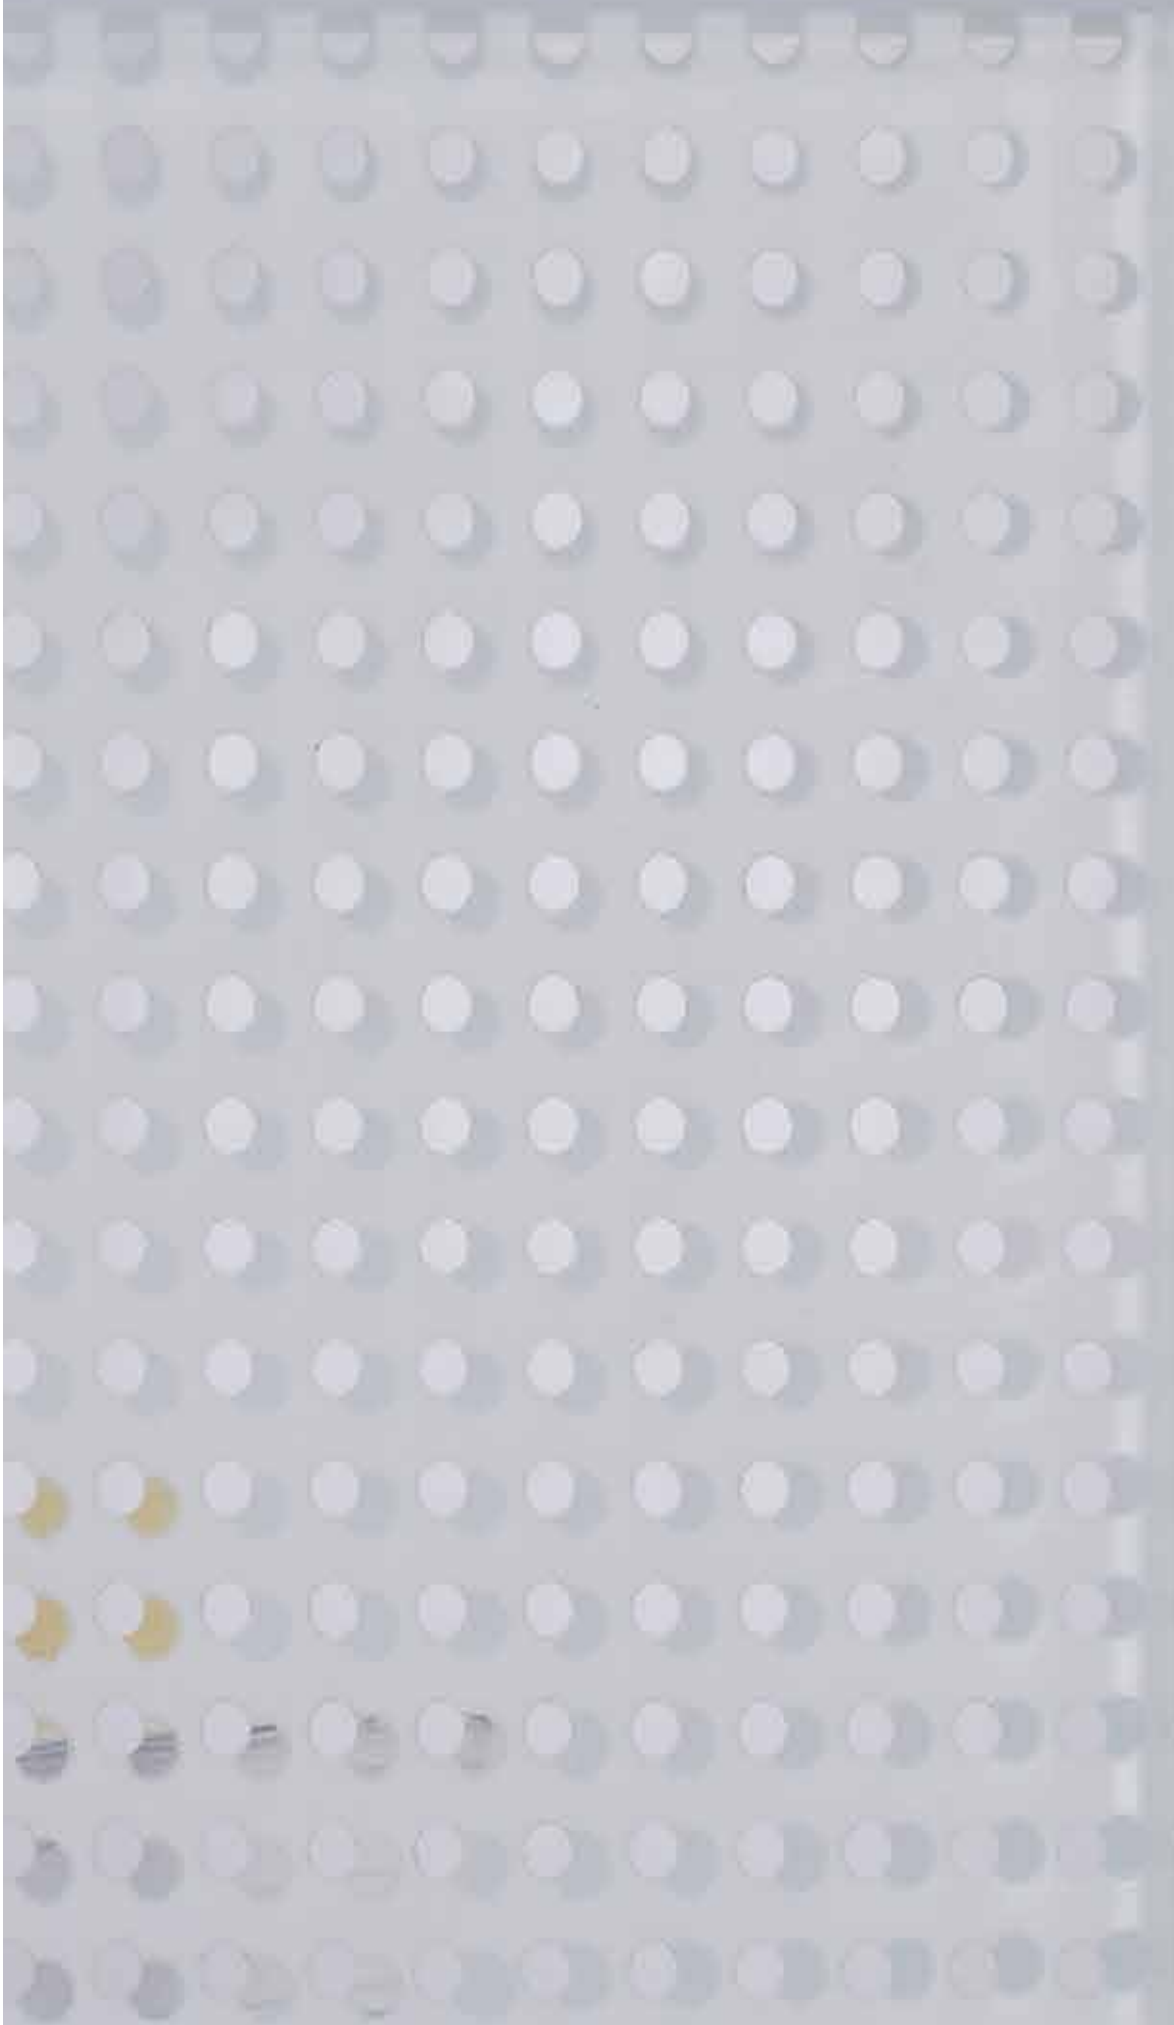

Laminated textiles are perfect for diffusing light and creating ambient while dividing rooms. Used by a lot of high-end interior designers and architects these products constantly provoke by its intricate nature and many details.
