

Bark

Texture glass is shaped in a kiln to reflect the imprinted shape of the mold it is placed on before heating. Our designers have created a collection inspired by nature, consisting of eight different textures that can be partially transparent, and if combined with a colored background or mirror, they can be more textured or glittery, and the colors even brighter. These designs allow for separation and privacy in many private and commercial applications.

max. dimensions: 2900 x 1900 mm

thickness: 4, 5, 6, 8, 10, 12 mm

safety treatment: tempered, laminated, tempered and laminated

glass type: low iron, float, blue, bronze, grey, green

processing options: drilling holes, cnc cutouts, shaping

applications: balustrade, cladding, facades, dividers, shower cabins, partitions

cleaning: Texture glass can be cleaned with liquid cleaners and paper towels, or soft clothes. Liquid cleaners without ammonia are recommended. Avoid all abrasive cleaning materials.

REMARK: Due to the manual and unique method of production, certain differences from the shown sample are possible.
