# Onyx Vert

dim. 300 x 200 mm

We create a magnificent stone effect by digitally printing a natural stone texture, marble or onyx pattern in high resolution. Our stone samples are high-resolution scans of real minerals, manipulated so that there is no pattern repetition on the glass surface. These are simple and economical solutions for all interiors, especially where the price of real stone is not acceptable. Perfect for large public and private spaces. Backlighting gives this kind of glass a nice transparency and luxurious feel, especially where natural or reflected light cannot penetrate, for example in hotel receptions, bars, restaurants and other hospitality venues.

max. dimensions:	3000 x 1500 mm
thickness:	8, 10, 12, 16, 20 mm
safety treatment:	laminated, tempered and laminated
glass type:	low iron
processing options:	drilling holes, cnc cutouts, shaping
applications:	balustrade, cladding, doors, dividers, feature walls, lightning, partitions
cleaning:	Stone glass can be cleaned with liquid cleaners and paper towels, or soft clothes. Liquid cleaners without ammonia are recommended. Avoid all abrasive cleaning materials.

REMARK: Glass can be translucent or opaque.
