

## Fine Mesh 50 Silver

Metal Mesh Laminated Collection glass is suitable for shaping various parts of furniture, partition walls for interiors and glass facades. The mesh structure, highlighted by a metal layer and additionally activated in interaction with light, achieves a strong aesthetic effect. Reflection of light creates 3D effects while ensuring light control and energy savings from a practical side. Glazing of facades and light control is achieved by choosing the appropriate fabric or mesh (light transmittance from 25% to 60% and thickness from 70 to 950 microns). They also save heat and energy, provide a high level of privacy and prevent bird strikes. They can be recycled.

maks. dimenzije: 3100 x 1500 mm

debljina: 9, 11, 13, 17, 21 mm

sigurnosne obrade: laminirano, kaljeno i laminirano

vrsta stakla: optiwhite, float, plavo, brončano, sivo, zeleno

mogućnosti obrade: bušenje rupa, CNC izrezi, nepravilni oblici

primjena: ograde, obloge, vrata, pregrade, rasvjetni zidovi

održavanje: Laminirano staklo se može čistiti tekućim sredstvima za čišćenje i papirnatim ručnicima ili mekom krpom. Preporučuju se tekuća sredstva za čišćenje bez amonijaka. Izbjegavajte sve abrazivne materijale za čišćenje.
