

Fine Mesh 50 Bronze

Metal Mesh Laminate Collection glass is suitable for shaping various pieces of furniture, partition walls for interiors and glass facades. The structure of the weave, highlighted by a metal layer and further enlivened in the interaction with light, achieves a strong aesthetic impression. Light reflection creates 3D effects while guaranteeing light control and practical energy saving. Shading of the facade and light control is achieved by choosing the appropriate fabric or mesh (light transmission from 25% to 60% and thickness from 70 to 950 microns). They also save heat and energy, provide a high level of privacy and prevent bird strikes. Products can be recycled.

max. dimensions: 3100 x 1500 mm

thickness: 9, 11, 13, 17, 21 mm

safety treatment: laminated, tempered and laminated

glass type: low iron, float, blue, bronze, grey, green
