

Etch Mirror Sketch

Visual artist and textile designer Silvio Vujičić created the S&S collection, which merge an innovative and experimental view of the world of textiles, combined with Bokart technologies. Textile laminates are actually textiles between two or more layers of glass. The process itself stops the textiles in a moment of time emphasizing the organic characteristics of the fibers. Textile laminates are the perfect collection when you want to diffuse light in the interior and create an ambiance when separating spaces. A favorite collection of top designers and architects because it constantly provokes with its complex nature and many details.

max. dimensions:	3000 x 1500 mm
thickness:	9, 11, 13, 17, 21 mm
safety treatment:	laminated, tempered and laminated
glass type:	low iron, float, blue, bronze, grey, green
processing options:	drilling holes, cnc cutouts, shaping
